- CALCULATE FIELDS

BUILDING CHARTS

Conclusion

Following a workflow is a time efficient method to create dashboards.

Time yourself at organizing your data pane to see if you can beat your prior record.

Smart Views are easy but can be a crutch.

Q & A

As data piles up, we have ourselves a genuine gold rush.
But data isn't the gold. I repeat, data in its raw form is boring crud.
The gold is what's discovered therein.
